About me

I've worked a lot in different teams, I know how to organize work, set goals for myself and others, find an approach to people and motivate them. I'm good in troubleshooting and I like make things done.

Skills

I know HTML, CSS, JavaScript, Git, Photoshop. Understood OOP principles. Already write my first app in React. I've an experience with Arduino, ESP8266, Bootstrap, Normalize, Firebase. Work with Asana, Trello, Notion, TickTick.

English - B1

Work Experience.

Ingoude Company

12.2020-08.2021

Team Lead in ACCU Reference - working with data ascension team in US laboratory

09.2018-10.2020

Team Lead in Bounty Hunters - we've worked with different bounty programs, ico, airdrops, etc

03.2016-05.2017

Mechanical Design Engineer in Bosch-Reverse engineering, developing concepts, design calculations, technical interviewing

04.2014-06.2016

Marketer in Bender Money, Admitad(CPA) - Buying traffic, A-B testing, making landing pages, advertising materials. The funniest project was selling audio-drugs :)

2012-2014

Volunteer in AIESEC and KrymSOS

Education projects

Movie searcher - it's my first React app. In this project I fetch data from open API and render it by React

My portfolio website - responsive design, a bit of JavaScript (I make filter for cards)

Tea shop - responsive design for tea shop, actually it's task from CodeCademy

Cookie predictions - this is a fun project, I've written JavaScript randomizer, that choose prediction in random interval

Snake - my first game in JavaScript, I used canvas for this project, most difficult was keep in mind all logic

React-chat - real time chat on react+firebase, with authorization, profiles, etc

Education.

Lviv Polytechnic National University

2011 - 2014

Graduated the Faculty of Design Engineering

Krivyi Rig National University

2007-2011

Graduated the Faculty of Mining Engineering
